

### **Specifications for Ice Flaker Machine:**

1. Automatic ice-flake making machine
2. Granular snow ice, designed for the laboratory
3. Stainless steel 304grade body to ensure long life, anti-corrosion and durable, compact and simple, space-saving.
4. Production capacity in 24hrs should be within 50-60 Kilograms.
5. Storage capacity of the bin should be within 12-17 Kilograms.
6. Fully insulated bin to ensure minimal loss of cooling and low power consumption
7. Automatic stop and start when there is full/no water or power supply
8. Designed for a noiseless operation
9. It should have energy efficient compressor.
