

Department of Chemical Engineering

April Cool Day(1st April, 2020)

The faculty members and students of Chemical Engineering Department celebrated April Cool Day on 1st April 2020.

April Cool Day is an initiative taken by our department that instead of making someone April's fool we should make our approaching summer Cool by planting trees and make other people aware of plantation and its benefits. Due to Corona outbreak, we all are in self quarantine so instead of going outside we decided to plant within our house backyard, garden and kitchen garden (lemon, giloe/amrita (tinospora verrucosa) and curry leaf saplings were planted). Some students planted tulsi, peppermint and aloe vera in garden pots due to lack of free space.
