

GRADESCOPE

Introduction & User Manual

Now DAV University registered members have the access of Gradscope: an assessment tool(a product of Turnitin). Gradscope is a suite of tools designed to accommodate a common grading workflow.

Students or instructors scan and upload their homework or exams. Instructors and Gradscope create a living rubric that allows for speedy grading of large courses. The software can reveal valuable statistics about students work, and provide a path for students to request re-grades of questions. To access the Gradscope services, pls follow the below procedure:

Click on the link <https://www.gradescope.com/>

Sign up for Free

Instructor

Fill all the required inf.

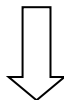

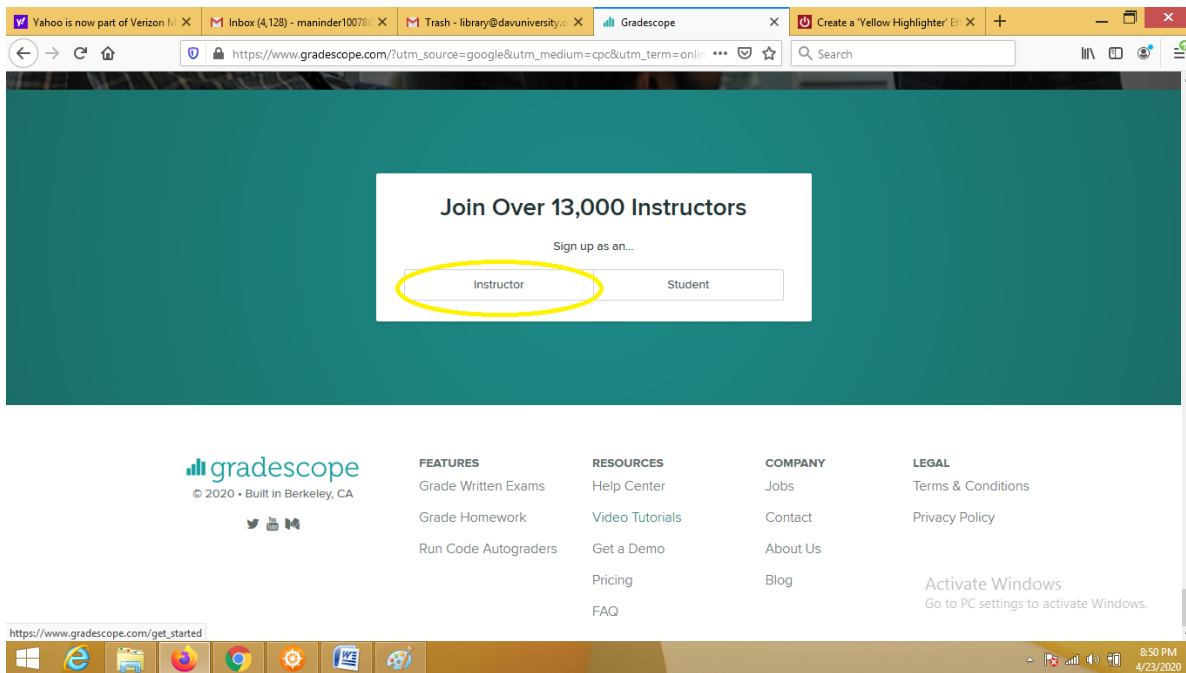

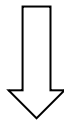

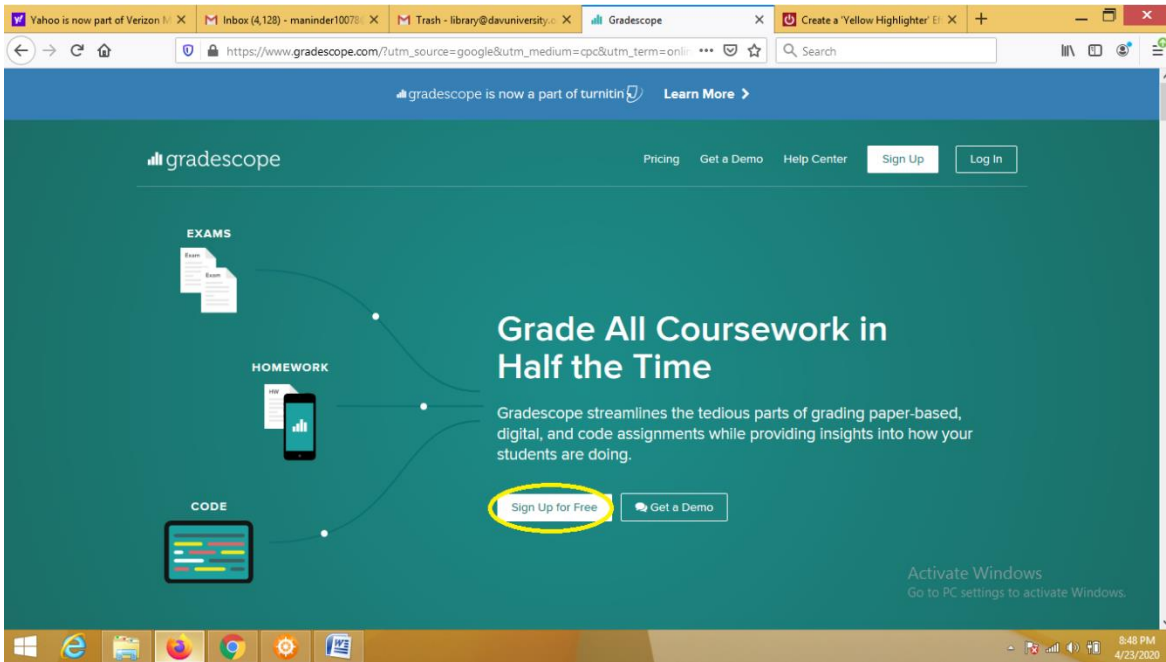

(in one field it will ask for invitation code, this is mandatory to fill and already sent on your mail which you have received from your Deptt. Head regarding Gradscope access) and

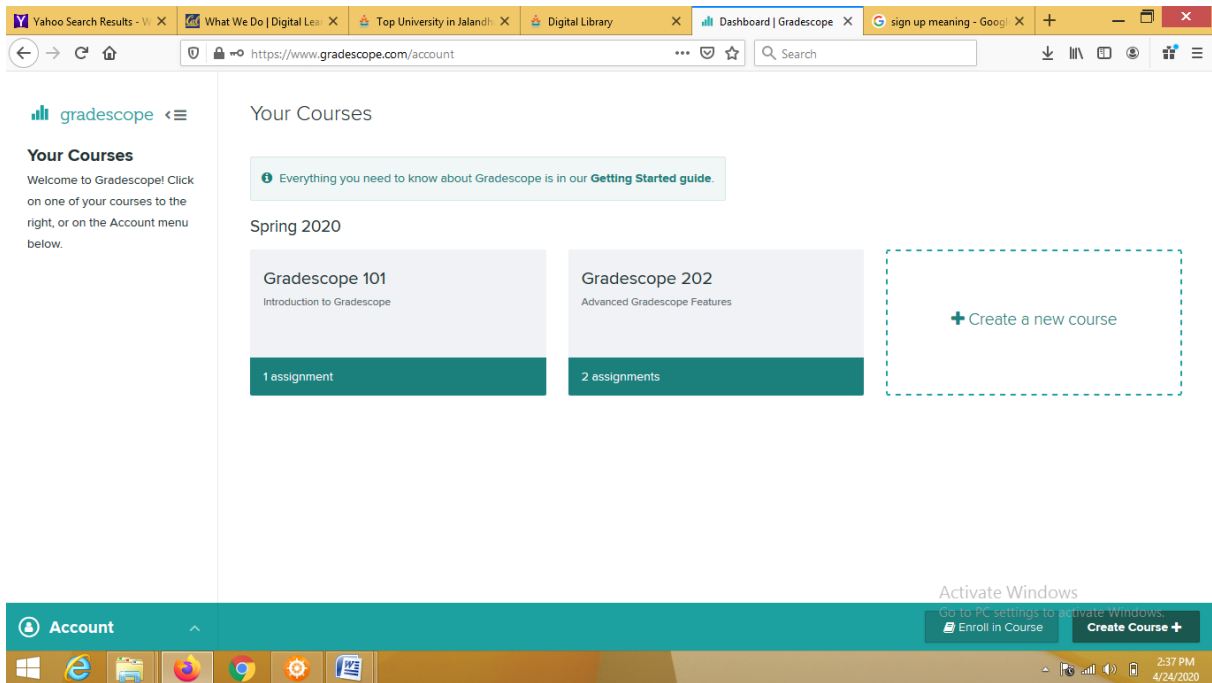

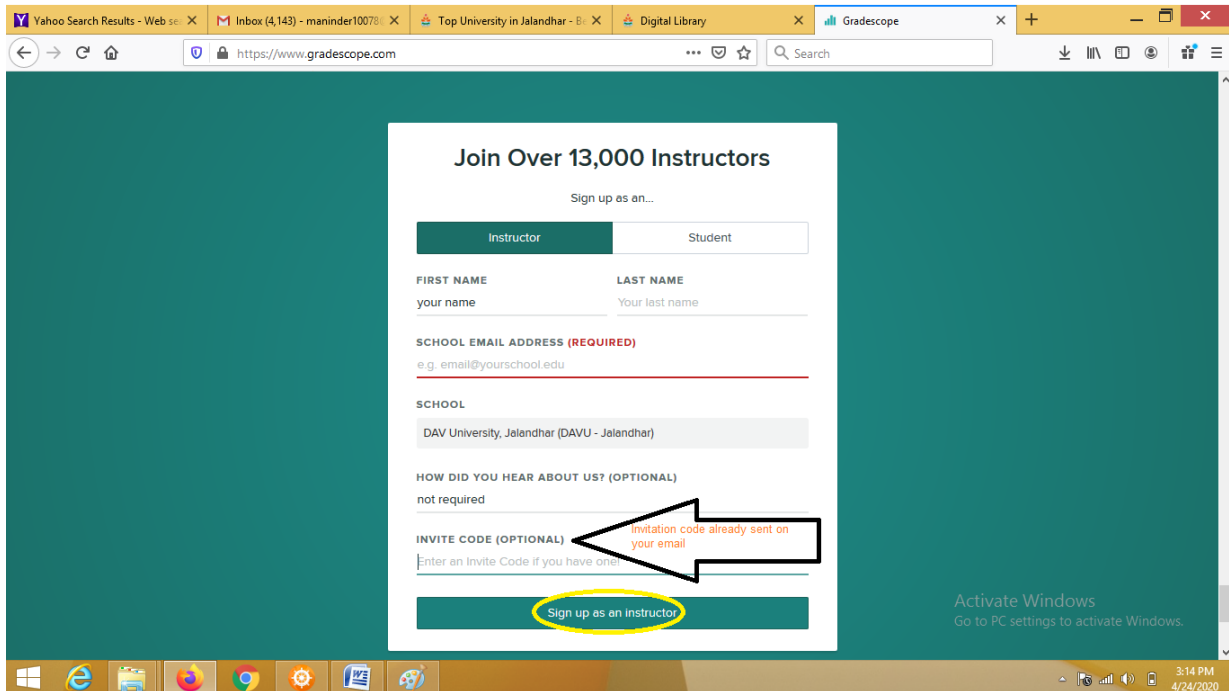

click on Sign up as instructor

On sign up, you will get a mail from Gradscope for setting up your account password, and your account will be set up. Now you can create your courses and add students .

Sample screenshot of sign up to Graescope are given as under:

For any query/help, you may contact the undersigned.
