FACULTY OF SCIENCE

Course Scheme & Syllabus For Bachelor of Computer Applications (Hons.) Specialization in Full Stack

(As per NEP-2020) Batch-2024 &onwards

(As per Choice Based Credit System)
1st TO 8th SEMESTER

Introductory Note of the Programme

The BCA program is designed to equip you with the knowledge and skills necessary to thrive in the rapidly evolving field of information technology. Over the course of this program, you will explore various aspects of computer science, including programming languages, database management, software development, networking, web development, and much more. Our curriculum is carefully crafted to strike a balance between theoretical knowledge and practical application, ensuring that you not only grasp the fundamental concepts but also gain hands-on experience in solving real-world problems.

Throughout this program, you will delve into the fundamentals of Cyber Security, including topics such as network security, cryptography, ethical hacking, risk management, incident response, and digital forensics. You will learn how to identify vulnerabilities, implement preventive measures, and respond effectively to security incidents, ensuring the integrity, confidentiality, and availability of digital information.

Program Educational Objectives (PEOs)

- **PEO-1.** Work productively as successful Computer professionals in diverse career paths including supportive and leadership roles on multidisciplinary teams or be active in higher studies.
- **PEO-2.** Communicate effectively, recognize and incorporate societal needs and constraints in their professional endeavours, and practice their profession with high regard to ethical responsibilities.
- **PEO-3.** Engage in life-long learning and to remain current in their profession to foster personal and organizational growth.

Programme Outcomes (POs)

- **PO-1:** Apply mathematics and computing fundamental and domain concepts to find out the solution of defined problems and requirements. (Computational Knowledge)
- **PO-2:** Use fundamental principle of Mathematics and Computing to identify, formulate research literature for solving complex problems, reaching appropriate solutions. (Problem Analysis)
- **PO-3:** Understand to design, analyze and develop solutions and evaluate system components or processes to meet specific need for local, regional and global public health, societal, cultural, and environmental systems. (Design/Development of Solutions)
- **PO-4:** Use expertise research-based knowledge and methods including skills for analysis and development of information to reach valid conclusions. (Conduct Investigations of Complex Computing Problems)
- **PO-5:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations. (Modern tool usage)

- **PO-6:** Exhibiting ethics for regulations, responsibilities and norms in professional computing practices. (Professional Ethics)
- **PO-7:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development (Environment and sustainability).
- **PO-8:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice (Ethics).
- **PO-9:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings (Individual and team work).
- **PO-10:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions (Communication).
- **PO-11:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments (Project management and finance).
- **PO-12:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change (Life-long learning).

Program Specific Objectives (PSOs)

- **PSO-1:** To explore technical comprehension in varied areas of Computer Applications and experience a conducive environment in cultivating skills for thriving career and higher studies.
- **PSO-2:** To comprehend, explore and build up computer programs in the allied areas like Algorithms, System Software, Multimedia, Web Design and Data Analytics for efficient design of computer-based systems of varying complexity.

Mapping of POs with PEOs

	Programming	3(2L+1P)	
	with FORTRAN		

Notes:

- a. Due to the constraint on total number of credits to be restricted under 160 for four year UG programmes, the mandatory courses which may or may not fall under ability-enhancement, skill-enhancement (common) or value- added courses can be offered as non-credit course and the student will have to qualify (as Satisfactory/Unsatisfactory) these courses to secure minimum passing marks through the process of assessment as mandated by DAV University.
- b. Minimum number of students feasible to run a common course (Ability- enhancement,
- c. Skill-enhancement (common) and Value-added) will be 20 students.
- d. *Pre-requisite to opt NCC is that the student must be in possession of Certificate B or has appeared in B-certificate exam of NCC. NCC course shall run in two semesters of 3 credits (2L+1P) in each semester. Student who wishes to opt for NCC is required to study in two semesters of total 6 credits

Course Title: Web Designing Laboratory

Course Code: CSP105

L	T	P	Credits	Marks
0	0	2	1	50

• Web designing using HTML, DHTML, CSS, and PHP.

Course Title: Object Oriented Programming Structures

Laboratory

Course Code: CSP104

L	T	P	Credits	Marks
0	0	2	1	50

- Implementation of OOP concepts using C++
- Write program in 'C++' language. Using input and output statements Using control statements.
- Using functions.
- Using array
- Using Classes and implementation of Constructor and Destructor.
- Using files.
- Using OOP's Concepts (Inheritance, Polymorphism,

Encapsulation, Friend and Static Functions, Exception Handling)

Semester – 2

Syllabus							CO Mapping
Unit 1	Introduct	ion (08 Hours)					CO1
•	Various Data Structures ,Common Operations on Data Structures, Algorithm Complexity, Time-Space Tradeoff Between Algorithms, Complexity of Algorithms String: Strings as ADTs, Representation and Manipulation, String Operations. Arrays Arrays Arrays Defined, Representing Arrays in Memory, Various Operations on Linear Arrays. Bubble Sort. Linear Search, Binary Search Records, Matrices, Sparse Matrices						CO2
•	Linked Lists, Stacks, Queues (08 Hours) Types of Linked Lists, Representing Linked Lists in Memory, traversing a linked List, Searching in a linked list, Memory Allocation and Garbage Collection, Insertion and deletion in a linked list. Circular Linked List. Advantage of Using Linked Lists Over Arrays, Various Operation on Linked Lists						CO2
	Stacks Description of Stack Structure, Implementation of Stack Using Arrays and Linked Lists, Applications of Stacks: Expression Conversion and evaluation – corresponding algorithms. QuickSort						
	_	Trees, Graphs, Hea	aps (08 Hou	ırs)			CO3
•	Queues		_	_	_		

	Implementation of Queue Using Linked Lists, Circular Queues, De-Queues,	
	Priority Queues.	
•	Trees	
	Description of Tree Structure and Its Terminology, Binary Tree,	
	representation in memory, Traversing Binary Trees, Traversal Algorithms	
	using Stacks.	
•	Graphs	
	Representation of Graphs and Applications: Adjacency Matrix, Path Matrix	
	Warshall's Algorithm, Linked Representation of a Graph	
	Traversing a Graph: DFS and BFS, Spanning Trees.	
	Heaps	
	Description of Heap Structure, Implementing Heaps Using Arrays	
Unit 4	Searching and Sorting Algorithms (08 Hours)	CO4
•	Linear Search, Binary Search	
•	Insertion Sort, Selection Sort, Bubble Sort, radix Sort, Merge Sort, Quick Sort	
	Files	
	Operations on Files, Types of Files	
	File Organizations : Sequential Files, Indexed Sequential File, Directed Files	
	and Multikey Files	
Practical:	List of Experiment:	
	Task 1: Write a program to insert a new element at end as well as at a given	
	position in an array.	
	Task 2: Write a program to delete an element from a given array whose value	
	is given or whose position is given.	
	Task 3: Write a program to find the location of a given element using Linear	
	Search. Task 4: Write a program to find the location of a given element using	
	Binary Search. Task 5: Write a menu driven program to perform following	
	insertion operations in a single linked list: i. Insertion at beginning ii.	
	Insertion at end iii. Insertion after a given node iv. Traversing a linked list	
	Task 6: Write a program to implement push and pop operations on a stack	
	using linear array.	
	Task 7: Write a program to convert an infix expression to a postfix expression	
	using stacks.	
	Task 8: Write a program to evaluate a postfix expression using stacks.	
	Task 9: Program to sort an array of integers in ascending order using bubble	
	sort.	
	Task 10: Program to sort an array of integers in ascending order using	
	selection sort	
	Task 11: Program to traverse graphs using BFS.	
	Task 12: Program to traverse graphs using DFS.

Course Code	CSP208						
Course Title		r Networks					
Course			urse the stude	nt will he sh	le to		
Outcomes		On the completion of the course the student will be able to CO1: Interaction with different hardware devices present in computer networks and					
Outcomes		arious network mo		devices presi	cht in compu	ter network	s and
	CO2: Interaction with data link layer and its protocols. CO3: Interaction various Routing algorithms. In addition to that functionality of						
	layer.	raction various ico	dung argorun	ins. in additi	on to that rul	ictionality c	n network
		ctionality of Trans	sport laver and	Implementa	ation of Appl	ication lave	r protocols
		orld scenarios.	port my or min	P	011 - PP1		Protocolo
Examination	Theory +						
Mode							
Assessment	Written	Assignment/	MSE	MTP	ESE	EPR	ABL/PBL
Tools	Quiz	Project Work					
Weightage	10%	10%	25%	-	50%	-	
Syllabus		•	•	l	.	l	CO
v							Mapping
Unit 1	Intro	duction to Data C	ommunicatio	n (08 Hou	ırs)		CO1
•		onents of Data Co			sentation		
	_	mission Impairmer		-		ng	
	Review of Network Hardware: LAN, MAN, WAN						
	Wireless networks, Internetworks						
	Review of Network Software: Layer, Protocols, Interfaces and Services						
	Review of Reference Models: OSI, TCP/IP and their comparison						
	Physic	cal Layer			_		
	Trans	smission Media: T	wisted pair, C	oaxial cable	, Fibre optics	S,	
	☐ Wireless transmission (Radio, Microwave, Infrared)						
Unit 2	Data Lin	k Layer (08 Hou	rs)				CO2
•		Error Correct	tion and Detec	ction			
		• Framing, No	iseless Chann	els and Nois	y Channels		
	 Framing, Noiseless Channels and Noisy Channels Multiple Access Protocol (ALOHA, CSMA, CSMA/CD, 						
		CSMA/CA)			,	,	
		Wired LANs					
Unit 3	Network	Layer (08 Hours					CO3
•				et Protocol	IPv4 and IPv	6	
	 Logical Addressing, Internet Protocol IPv4 and IPv6 Design Issues, Routing Algorithms (Shortest Path, Flooding, 						
	Design Issues, Routing Algorithms (Shortest Fath, Flooding, Distance Vector, Hierarchical, Broadcast, Multicast)						
		,	ing, IP Protoc	*	,		
Unit 4	Transnor	t Layer (08 Hou		<u>,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,</u>			CO4
	Transpor	• Flow Contro					
			nsport Protoco	l (TCD and I	IDD)		
			-			on buoleat	
		_	Control Algori	unns (Leak)	oucket, 10k	en bucket,	
	1	Load shedding	ng <i>)</i>				1

	Application Layer	
	 Domain name system, Email, File transfer protocol 	
	HTTP, HTTPS, World Wide Web.	
Practical:	List of Experiment:	
	Task 1. Specifications of latest desktops and laptops.	
	Task 2. Familiarization with Networking Components and devices: LAN	
	Adapters, Hubs, Switches, Routers etc.	
	Task 3. Familiarization with Transmission media and Tools: Co-axial cable,	
	UTP Cable, Crimping Tool, Connectors etc.	
	Task 4. Preparing straight and cross cables.	
	Task 5. Study of various LAN topologies and their creation using network	
	devices, cables and computers.	
	Task 6. Configuration of TCP/IP Protocols in Windows and Linux.	
	Task 7. Implementation of file and printer sharing.	
	Task 8. Designing and implementing Class A, B, C Networks	
	Task 9. Subnet planning and its implementation	
	Task 10. Installation of ftp server and client
