

# **FACULTY OF SCIENCE**

**Course Scheme & Syllabus  
For  
Bachelor of Computer Applications (Hons.)  
Specialization in  
Full Stack**

**(As per NEP-2020)  
Batch-2024 & onwards**

## **Introductory Note of the Programme**

The BCA program is designed to equip you with the knowledge and skills necessary to thrive in the rapidly evolving field of information technology. Over the course of this program, you will explore various aspects of computer science, including programming languages, database management, software development, networking, web development, and much more. Our curriculum is carefully crafted to strike a balance between theoretical knowledge and practical application, ensuring that you not only grasp the fundamental concepts but also gain hands-on experience in solving real-world problems.

Throughout this program, you will delve into the fundamentals of Cyber Security, including topics such as network security, cryptography, ethical hacking, risk management, incident response, and digital forensics. You will learn how to identify vulnerabilities, implement preventive measures, and respond effectively to security incidents, ensuring the integrity, confidentiality, and availability of digital information.

## **Program Educational Objectives (PEOs)**

**PEO-1.** Work productively as successful Computer professionals in diverse career paths including supportive and leadership roles on multidisciplinary teams or be active in higher studies.

**PEO-2.** Communicate effectively, recognize and incorporate societal needs and constraints in their professional endeavours, and practice their profession with high regard to ethical responsibilities.

**PEO-3.** Engage in life-long learning and to remain current in their profession to foster personal and organizational growth.

## **Programme Outcomes (POs)**

**PO-1:** Apply mathematics and computing fundamental and domain concepts to find out the solution of defined problems and requirements. (Computational Knowledge)

**PO-2:** Use fundamental principle of Mathematics and Computing to identify, formulate research literature for solving complex problems, reaching appropriate solutions. (Problem Analysis)

**PO-3:** Understand to design, analyze and develop solutions and evaluate system components or processes to meet specific need for local, regional and global public health, societal, cultural, and environmental systems. (Design/Development of Solutions)

**PO-4:** Use expertise research-based knowledge and methods including skills for analysis and development of information to reach valid conclusions. (Conduct Investigations of Complex Computing Problems)

**PO-5:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations. (Modern tool usage)

**PO-6:** Exhibiting ethics for regulations, responsibilities and norms in professional computing practices.  
(Professional Ethics)

**PO-7:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development (Environment and sustainability).

**PO-8:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice (Ethics).

**PO-9:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings (Individual and team work).

**PO-10:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions (Communication).

**PO-11:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments (Project management and finance).

**PO-12:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change (Life-long learning).

### **Program Specific Objectives (PSOs)**

**PSO-1:** To explore technical comprehension in varied areas of Computer Applications and experience a conducive environment in cultivating skills for thriving career and higher studies.

**PSO-2:** To comprehend, explore and build up computer programs in the allied areas like Algorithms, System Software, Multimedia, Web Design and Data Analytics for efficient design of computer-based systems of varying complexity.

### Mapping of POs with PEOs

PEOs→ POs↓	PEO 1	PEO 2	PEO 3
PO1	Yes	Yes	Yes
PO2			Yes
PO3	Yes		Yes
PO4		Yes	
PO5		Yes	
PO6			Yes
PO7	Yes		Yes
PO8			
PO9		Yes	
PO10	Yes		Yes
PO11		Yes	
PO12	Yes	Yes	

### Mapping of PSO with PEO

PEOs→ PSO↓	PEO 1	PEO 2	PEO 3
PSO1	Yes	-----	Yes
PSO2	-----	Yes	Yes

6	-----	-----	MC	4	0	0	4
<b>Total</b>							<b>20</b>

**L- Lectures T- Tutorial P- Practical Cr.- Credits**

### MC (MINOR COURSE)- (Choose One)

S.No	Paper Code	Course Title	L	T	P	Cr
1	CSP315	Digital Image Processing	3	0	2	4
2	CSP316	R Programming	3	0	2	4
3	CSP317	Machine Learning	3	0	2	4

**Note: If the Student get CGPA  $\geq 7.5$  then He / She will have to submit the Research Project with 12 Credit.**

### THIRD EXIT:

**The student will be awarded “Bachelors in Computer Science & Applications” degree after exit at this point.**

### Semester 7

S. No	Paper Code	Course Title	Course Category	L	T	P	Cr
1	CSP431	Angular & Node JS	DSC	3	0	2	4
2	CSP432	Advanced Java	DSC	3	0	2	3
3	CSP433	Fundamentals of Designs	DSC	3	0	0	3
4	CSP401	Research Methodology	MC	4	0	0	4
5	CSP435	Project Management	VOC	3	0	0	2
6	CSP437	Cloud Computing & DevOps	DSC	3	0	2	4
Total							20

**L- Lectures T- Tutorial P- Practical Cr.- Credits**

### Semester 8

S. No	Paper Code	Course Title	Course Category	L	T	P	Cr
1	CSP436	React.JS & MongoDB	DSC	3	0	2	4
2	CSP402	Internet of Things	DSC	3	0	2	4
3	CSP410*	Major Project	-----	6	0	0	6
4	CSP438*	Mobile development platforms (Kotlin, Swift, React Native)	MC	3	0	0	3
5	CSP439*	Introduction to Hosting servers (AWS, Apache and Heroku)	DSC	3	0	0	3
Total							20

**L- Lectures T- Tutorial P- Practical Cr.- Credits**

\*Those students are adopting the research project they are exempted these courses. (12 credit)

S.No	Paper Code	Course Title	Course Category, Discipline Specific Elective (DSE)	L	T	P	Cr
1	CSP415	Research Project	-----	0	0	24	12
Total							12

**L- Lectures T- Tutorial P- Practical Cr.- Credits**

### FOURTH EXIT:

The student will be awarded “Bachelor of Computer Science and Applications (Hons.)

**Specialization in Cyber Security” degree after exit at this point.**

**List of multi-disciplinary open elective courses at DAV University**

<b>Sr. No.</b>	<b>Course Name</b>	<b>Faculty/Department</b>
1	Basics of Physics	Physics
2	Basics of Chemistry	Chemistry
3	Basics of Biology	Zoology & Botany
4	Introductory Biotechnology	Biotechnology
5	Introductory Microbiology	Microbiology
6	Functioning of the Human Body	Zoology
7	Introductory Botany	Botany
8	Business Management for Beginners	CBME
9	Fundamental of Mutual Funds	CBME
10	Economics for Beginners	CBME
11	Professional Communication	English
12	Fine Arts	Arts, Fine Arts & Performing Arts
13	Jyotish: ‘Eye of the Veda’	Vedic Studies
14	Mathematical Statistics	Mathematics
15	Introductory Journalism	JMC
16	Professional Photography	JMC
17	Library Information Sciences	Library Sciences

## Common courses with credits

Ability-Enhancement Courses	Cr.	Skill-Enhancement Courses	Cr.	Value-Added Courses	Cr.
Personality Enhancement	1L+1P	Essentials of Entrepreneurship-Thinking and Action	2L+1P	Environmental Studies (Mandatory)	2L+1P
Personality Development	2P	Design Thinking	2P	Human Values and Ethics (Mandatory)	2L+1T
Behavioural & Life Skills	1L+1P	Design Thinking & Innovation	2L	Gender Sensitization	2L
Global Citizenship in Higher Education	2L	Data Analytics	2L+1P	Professional Ethics	2L
Communication Skills (Mandatory)  <b>OR</b>  Cambridge English-I (Mandatory#) & Cambridge English-II (Mandatory#)  <i># To be offered in two semesters</i>	1L+1P	Cyber Security	3 (2L+1P)	Sustainable Development	2L
		Digital Fluency	1L+1P	Green Technologies	2L
	1L+1P				
	1L+1P				
Health & Yoga	1L+1P	Fundamentals of Computer programming & IT(FCPIT)	2L	General Studies	2L
Technical Report Writing	2L	Python Programming	3 (2L+1P)	NSS	2 (1L+1P)
Leadership Management	2L	Disaster Preparedness and Planning	2L		
Therapeutic Yoga	1L+1P	Intellectual Property Rights	2L		
Creative & Critical Thinking	1L+1P	Apiculture	2P		

Community Engagement & Social Responsibility (Mandatory)	1L+1P	NCC*	3 (2L+1P)		
		LATEX	3 (1L+2P)		
		Programming with FORTRAN	3(2L+1P)		

**Notes:**

- a. Due to the constraint on total number of credits to be restricted under 160 for four year UG programmes, the mandatory courses which may or may not fall under ability-enhancement, skill-enhancement (common) or value-added courses can be offered as non-credit course and the student will have to qualify (as Satisfactory/Unsatisfactory) these courses to secure minimum passing marks through the process of assessment as mandated by DAV University.*
- b. Minimum number of students feasible to run a common course (Ability- enhancement,*
- c. Skill-enhancement (common) and Value-added) will be 20 students.*
- d. \*Pre-requisite to opt NCC is that the student must be in possession of Certificate B or has appeared in B-certificate exam of NCC. NCC course shall run in two semesters of 3 credits (2L+1P) in each semester. Student who wishes to opt for NCC is required to study in two semesters of total 6 credits*

## Semester 1

L	T	P	Credit
3	0	0	3

Course Code	<b>CSP101</b>						
Course Title	<b>Principles of Digital Electronics</b>						
Course Outcomes	<p>On the completion of the course the student will be able to</p> <p>CO1: To provide the knowledge about the various electronics components and digital circuits to the students and designing of various building blocks of computer system concepts. CO2: To introduce the basic concepts and laws involved in the Boolean algebra and logic families and digital circuits.</p> <p>CO3: To familiarize with the different number systems, logic gates, and combinational and sequential circuits utilized in the different digital circuits and systems.</p> <p>CO4: To design and analysis of the digital circuit and system. After studying this subject student will be able to easily understand the internal working of digital electronic circuits.</p>						
Examination Mode	Theory/ Practical/ Theory + Practical						
Assessment Tools	Written Quiz	Assignment/ Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	10%	25%	-	50%	-	5%
Syllabus							<b>CO Mapping</b>
Unit 1	<b>Fundamentals of Digital Electronics &amp; Number System</b>						CO 1
	Definitions of Digital Signals, Digital Waveform, Digital Logic, Gate propagation delay time, Digital Operations, Digital Integrated Circuits, Digital IC signal levels.						
	Decimal Number System, Binary Number System, Octal Number System, Hexadecimal Number System, Conversion from One Number System to another, Arithmetic Operation without Changing the Base, 1's Complement and 2's Complement.						
	Logic Gates: AND, OR, NOT, NAND, NOR XOR, XNOR, NAND & NOR as Universal Gates, Logic Gates Applications.						
Unit 2	<b>Boolean Algebra &amp; Combinational Circuits</b>						CO2
	Introduction, Theorems, Simplification of Boolean Expression using Boolean Algebra, SOP&POS Forms, Realization of Boolean Expression using Gates, K Maps, Simplification of Boolean Expression using K Maps.						
	Half Adder & Half Subtractor, Full Adder & Full Subtractor, Parallel Binary Adder, Binary Adder/Subtractor.						
Unit 3	<b>Combinational &amp; Sequential Logic Circuits</b>						CO3
	Multiplexers Demultiplexers, Implementation of Boolean equations using Multiplexer and Demultiplexer						
	Encoders Decoders.						

	Latch, Flip Flops RS Flip Flop, JK Flip Flop, Master Slave JK Flip Flop Race Condition, Removing Race Condition, D Flip Flop, T Flip Flop, Applications of Flip Flops	
Unit 4	<b>Semiconductor&amp; Memories</b>	CO 4
	Introduction, Static and dynamic devices, read only &random-access memory chips, PROMS and EPROMS Address selection logic.	
	Read and write control timing diagrams for ICs.

Course Code	<b>CSP102</b>						
Course Title	<b>Computer Fundamentals and Office Automation</b>						
Course Outcomes	<p>On the completion of the course the student will be able to</p> <p>CO1: Illustrates different components of computer, its Characteristics, generations and application. Explain different number system used in computer system and binary arithmetic.</p> <p>CO2: Introduce computer memory and I/O devices. Explain different computer languages and types of computer operating system.</p> <p>CO3: Discusses DOS history and various DOS commands. Introduce features of MS word and its usage.</p> <p>CO4: Introduce excel worksheet and various excel functions. Explain use of MS-Power point and MS-Access.</p>						
Examination Mode	Theory/ Practical/ Theory + Practical						
Assessment Tools	Written Quiz	Assignment/ Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	10%	25%	-	50%	-	5%
Syllabus							<b>CO Mapping</b>
Unit 1	<b>Fundamentals of Computer &amp; Number System</b>						CO1
•	Block Structure of a Computer, Characteristics of Computers, Computer generations, Applications of Computers. Classification of Computers based on size and chronology.						
•	Bit, byte, binary, decimal, hexadecimal, and octal systems, conversion from one system to the other, representation of characters, integers and fractions.						
•	Binary Addition, subtraction and multiplication.						
Unit 2	<b>Operating System, Memory Types &amp; Input/output Devices</b>						CO2
•	RAM, ROM, Cache and Secondary memory.						
•	Input devices: Keyboard, Mouse, Light pen, Joystick, Mouse, OCR, OMR, MICR. Output devices: Monitor, Impact, non-impact, working mechanism of Drum printer, Dot Matrix printer, Ink jet printer and Laser printer, plotters.						
•	Machine language, assembly language, higher level language, 4GL and introduction to Compiler, Interpreter, Assembler.						
•	Batch, multi programming, time sharing, multi-processor operating system, online and real time operating system, distributed operating system.						
Unit 3	<b>Disk Operating System &amp; MS Word</b>						CO3
•	DOS–History, Internal and External Commands, Batch Files						

•	Salient Features Of MSWORD, Creating, saving, opening and printing	
	files, formatting pages, paragraphs and sections, checking Spelling and grammar; creating lists and numbering. Headings, styles, fonts and font size. Finding and replacing text, inserting page breaks, page numbers, symbols, images and dates. Using tables, header, footer. Using mail merge features.	
Unit 4	<b>MS Excel, MS PowerPoint and MS Access</b>	CO4
•	Excel Worksheet, Data Entry, Editing, Cell Addressing Ranges, Copying & Moving Cell Content, Inserting and Deleting Rows and Column, Column Formats, Printing, Creating, displaying charts, Working with functions - Date and time function, Statistical function, Mathematical and Trigonometric functions, Text function, Logical functions.	
•	Presentation overview, entering information, Presentation creation, opening and saving presentation, using transitions and animations.	
•	Creating a Database using MS Access, Basic Tables, Using Queries, Using the Auto Form Feature, Form Design, Using the Auto Report Feature, Report Design, Copying Data, Freezing Columns, Printing Tables, Printing Reports, Sorting Records, Using the Filter Sorts, Renaming Columns.

Course Code	<b>CSP103</b>						
Course Title	<b>Algorithm Design and Programming Using C</b>						
Course Outcomes	<p>On the completion of the course the student will be able to</p> <p>CO1: To define the concept of problem solving and steps to solving problems in computer application are using algorithms, pseudo-codes and flowcharts sequential, selection and repetition structure.</p> <p>CO2: To understand the Concept of fundamentals of programming &amp; Control structure.</p> <p>CO3: Apply the concepts of Function, arrays, Structure &amp; Union.</p> <p>CO4: Demonstrate the ability to write C programs using pointers and file handling.</p>						
Examination Mode	Theory/ Practical/ Theory + Practical						
Assessment Tools	Written Quiz	Assignment/ Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	10%	25%	-	50%	-	5%
<b>Syllabus</b>							<b>CO Mapping</b>
Unit 1	<b>Fundamentals of algorithms and programming, Operations and Expressions &amp; Control Structures</b>						CO1
•	Concept: problem-solving, Problem-solving techniques (Trial & Error, Brain storming, Divide & Conquer), Steps in problem solving (Define Problem, Analyze Problem, Explore Solution), Algorithms and Flowcharts (Definitions, Symbols), pseudo-codes.						
•	Character Set, Identifiers and Keywords, Data types, Constants, Variables, Expressions, Statements, Symbolic Constants and Operators & its types.						
•	Single Character Input, Single Character Output, Entering Input Data More About Scan Functions, Writing Output Data, More About Print Functions, Gets and Puts Functions, Library functions.						
Unit 2	<b>Decision Making and Looping Statements &amp; Array</b>						CO2
•	Introduction, Decision Making with If-Statement, If Else and Nested If, While and Do-While, For Loop, Jump Statements: Break, Continue, Go to, Switch Statement.						
•	Introduction to Arrays, Array Declaration, Single and Multi-dimensional Array, Memory Representation, Matrices, Strings, String Handling Functions.						
Unit 3	<b>Functions, Structure and Union</b>						CO3
•	Introduction To Functions, Function Declaration, Function Categories, Standard Functions, Parameters and Parameter Passing, Pass – By Value/Reference Recursion, Global and Local Variables, Storage Classes.						
•	Declaration of Structure, Accessing Structure Members, Structure Initialization, Arrays of Structure, Nested Structures, Unions.						
Unit 4	<b>Pointers, Files &amp; Preprocessor Directives</b>						CO4

•	Introduction To Pointers, Address Operator and Pointers, Declaring and Initializing Pointers, Assignment through Pointers, Pointers and Arrays.	
•	Introduction, creating a Data File, Opening and Closing a Data File, Processing a Data File.	
•	Introduction and Use, Macros, Conditional Preprocessors, Header Files

**Course Title: Office Automation Laboratory**  
**Course Code: CSP102**

L	T	P	Credits	Marks
0	0	2	1	50

- Working of DOS internal & external commands.
- Learning to use MS WORD, MS EXCEL.
- Using MS PowerPoint to make slides and presentations.
- Introduction to the Database Window, Database Objects, Database Terminology
- Creating a Database using MS Access, Basic Tables
- Using Queries, Using the Auto Form Feature Form Design
- Using the Auto Report Feature, Report Design
- Copying Data, Freezing Columns
- Printing Tables, Printing Reports
- Sorting Records, Using the Filter Sorts, Renaming Columns

**Course Title: C Programming Laboratory**  
**Course Code: CSP103**

L	T	P	Credits	Marks
0	0	2	1	50

**Implementation of C programming concepts:**

- Control Structures, Loops, Arrays, Strings
- Functions, Structures, Union, Files, etc.

L	T	P	Credit
3	0	2	4

Course Code	<b>CSP104</b>						
Course Title	<b>Object Oriented Programming using C++</b>						
Course Outcomes	<p>On the completion of the course the student will be able to</p> <p>CO1: Discuss the concepts of OOPs. Comparison with the previously developed languages.</p> <p>CO2: Developing the concepts of Classes and object by using real-world examples.</p> <p>CO3: Implement the concepts of Friend function and Inheritance.</p> <p>CO4: Developing the programs using the concept of virtual function and using the concept of file handling.</p> <p>CO5: Interaction with the IDE and help in understanding the concept of OOPs.</p>						
Examination Mode	Theory/ Practical/ Theory + Practical						
Assessment Tools	Written Quiz	Assignment/ Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	10%	25%	-	50%	-	5%
Syllabus							<b>CO Mapping</b>
Unit 1	<b>Introduction to OOPS &amp; Class Concepts</b>						CO1,5
•	Evolution Of OOP, OOP Features of C++, Characteristics of Object-Oriented Language – Objects, Classes, Inheritance, Reusability, User Defined Data Types, Polymorphism, Overloading, Comparison of C with C++.						
•	Class and Objects, Inline Functions, Static Data, Members and Member Functions, Constructors and Destructors.						
•	Dynamic Objects, Array of Pointers to Object, Pass By Value Vs. Pass By Reference, Local and Global Class, Nested and Empty Class, Preprocessor Directives, Namespace.						
Unit 2	<b>Console/O &amp; Operator Overloading</b>						CO2
•	Hierarchy of Console Stream Classes, Unformatted and Formatted I/O Operations, Manipulators						
•	Overloadable Operators, Overloading Unary and Binary, Arithmetic and Relational Operators, Overloading Subscript, Array, Insertion, Extraction, New and Delete Operators.						
Unit 3	<b>Friend Function and Type Conversion &amp; Inheritance</b>						CO3
•	Friend Function, Function Overloading, Overloading Operators through Friend Function						
•	Basic Type Conversion, Conversion Between Objects and Basic Types, Conversion Between Objects of Different Classes						

•	Derivation Rules, Different Forms of Inheritance, Roles of Constructors and Destructors in Inheritance	
Unit 4	<b>Virtual Functions &amp; File Handling</b>	CO4
•	Virtual Functions and Their Needs, Pure Virtual Function, Virtual Destructor, Virtual Derivation, Abstract Class.	
•	Hierarchy of File Stream Classes, Opening and Closing Files.	
•	File Modes, Testing for Errors, File Pointers and Their Manipulations,	
	ASCII & Binary Files, Sequential and Random-Access Files

Course Code	<b>CSP105</b>						
Course Title	<b>Web Designing</b>						
Course Outcomes	On the completion of the course the student will be able to CO1: Introduce the creation of static webpages using HTML. CO2: Using PHP for back-end manipulations, arrays and functions. CO3: Working with PHP forms and manipulating files. CO4: Publishing web sites.						
Examination Mode	Theory/ Practical/ Theory + Practical						
Assessment Tools	Written Quiz	Assignment/ Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	10%	25%	-	50%	-	5%
<b>Syllabus</b>							<b>CO Mapping</b>
Unit 1	<b>Introduction to Web Development &amp; HTML/DHTML</b>						CO1
•	Website, Webpage, Static Website, Dynamic Website.						
•	HTML Basics, HTML Elements (Tags), Structure of HTML Program, Attributes, Headings, Paragraphs, Formatting, Links, Images, Tables, Lists, Forms, Frames, where to put Tables, Lists, Images, Forms.						
•	CSS in D HTML, Implementation of Web Pages using CSS						CO2
Unit 2	<b>Introduction to PHP</b>						
•	Introduction to PHP, PHP Environment, Syntax Overview, Variable Types.						
•	Decision Making, Control Statements, Arrays, Strings, Functions and Objects						
Unit 3	<b>PHP forms and manipulating files and Connectivity</b>						CO3
•	Working with Forms, Web Concepts, GET & POST, Maintaining Cookies and Sessions						
•	Working with Files, Opening, closing, coping, renaming and deleting a file, File uploading and downloading, Generating and creating Images with PHP						
•	Database Connectivity with MySQL, performing basic operations (insert, delete, update, select).						
Unit 4	<b>Purchasing a Domain Name &amp; Web Space</b>						CO4
•	Domain Name & Web Space, Getting a Domain Name & Web Space (Purchase or Free),						
•	Uploading the Website to Remote Server.

**Course Title: Web Designing Laboratory**

**Course Code: CSP105**

L	T	P	Credits	Marks
0	0	2	1	50

- Web designing using HTML, DHTML, CSS, and PHP.

**Course Title: Object Oriented Programming Structures Laboratory**

**Course Code: CSP104**

L	T	P	Credits	Marks
0	0	2	1	50

- Implementation of OOP concepts using C++
- Write program in 'C++' language. • Using input and output statements • Using control statements.
- Using functions.
- Using array
- Using Classes and implementation of Constructor and Destructor.
- Using files.
- Using OOP's Concepts (Inheritance, Polymorphism, Encapsulation, Friend and Static Functions, Exception Handling)

Course Code	<b>CSP204</b>						
Course Title	<b>Data Structures</b>						
Course Outcomes	<p>On the completion of the course the student will be able to</p> <p>CO1: Student will be able to handle operation like searching, insertion, deletion, traversing on various Data Structures;</p> <p>CO2: Student will able to write an algorithm Selection Sort, Bubble Sort, Insertion Sort, Quick Sort, Merge Sort;</p> <p>CO3: Students will be able to choose appropriate Data Structure as applied to specific problem definition;</p> <p>CO4: Implement Various searching algorithms and become familiar with their design methods.</p>						
Examination Mode	Theory and Practical						
Assessment Tools	Written Quiz	Assignment/ Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	10%	25%	-	50%	-	
<b>Syllabus</b>							<b>CO Mapping</b>
<b>Unit 1</b>	<b>Introduction (08 Hours)</b>						CO1
	<ul style="list-style-type: none"> <li>Primitive and Composite Various Data Structures ,Common Operations on Data Structures, Algorithm Complexity, Time-Space Tradeoff Between Algorithms, Complexity of Algorithms</li> </ul>						
	<ul style="list-style-type: none"> <li><b>String:</b> Strings as ADTs, Representation and Manipulation, String Operations.</li> </ul>						
	<ul style="list-style-type: none"> <li><b>Arrays</b> Arrays Defined, Representing Arrays in Memory, Various Operations on Linear Arrays. Bubble Sort. Linear Search, Binary Search Records, Matrices, Sparse Matrices</li> </ul>						
<b>Unit 2</b>	<b>Linked Lists, Stacks, Queues (08 Hours)</b>						CO2
	<ul style="list-style-type: none"> <li>Types of Linked Lists, Representing Linked Lists in Memory, traversing a linked List, Searching in a linked list, Memory Allocation and Garbage Collection, Insertion and deletion in a linked list. Circular Linked List. Advantage of Using Linked Lists Over Arrays, Various Operation on Linked Lists</li> </ul>						
	<ul style="list-style-type: none"> <li><b>Stacks</b> Description of Stack Structure, Implementation of Stack Using Arrays and Linked Lists, Applications of Stacks: Expression Conversion and evaluation – corresponding algorithms. QuickSort</li> </ul>						
<b>Unit 3</b>	<b>Queues, Trees, Graphs, Heaps (08 Hours)</b>						CO3
	<ul style="list-style-type: none"> <li><b>Queues</b></li> </ul>						

	Implementation of Queue Using Linked Lists , Circular Queues, De-Queues, Priority Queues.	
•	<b>Trees</b> Description of Tree Structure and Its Terminology, Binary Tree, representation in memory, Traversing Binary Trees, Traversal Algorithms using Stacks.	
•	<b>Graphs</b> Representation of Graphs and Applications: Adjacency Matrix, Path Matrix Warshall's Algorithm, Linked Representation of a Graph Traversing a Graph: DFS and BFS, Spanning Trees. <b>Heaps</b> Description of Heap Structure, Implementing Heaps Using Arrays	
<b>Unit 4</b>	<b>Searching and Sorting Algorithms (08 Hours)</b>	<b>CO4</b>
•	Linear Search, Binary Search Insertion Sort, Selection Sort, Bubble Sort, radix Sort, Merge Sort, Quick Sort	
	<b>Files</b> Operations on Files, Types of Files <b>File Organizations:</b> Sequential Files, Indexed Sequential File, Directed Files and Multikey Files	
<b>Practical:</b>	<b>List of Experiment:</b> Task 1: Write a program to insert a new element at end as well as at a given position in an array. Task 2: Write a program to delete an element from a given array whose value is given or whose position is given. Task 3: Write a program to find the location of a given element using Linear Search. Task 4: Write a program to find the location of a given element using Binary Search. Task 5: Write a menu driven program to perform following insertion operations in a single linked list: i. Insertion at beginning ii. Insertion at end iii. Insertion after a given node iv. Traversing a linked list Task 6: Write a program to implement push and pop operations on a stack using linear array. Task 7: Write a program to convert an infix expression to a postfix expression using stacks. Task 8: Write a program to evaluate a postfix expression using stacks. Task 9: Program to sort an array of integers in ascending order using bubble sort. Task 10: Program to sort an array of integers in ascending order using selection sort Task 11: Program to traverse graphs using BFS. Task 12: Program to traverse graphs using DFS.

## SEMESTER 5

L	T	P	Credit
3	0	2	4

Course Code	<b>CSP303</b>						
Course Title	<b>Web Engineering using ASP.NET</b>						
Course Outcomes	CO1: To explain the three pillars of object oriented programming. CO2: To develop working knowledge of Standard Controls, validation controls and Rich controls. CO3: To learn to design Website with Master Pages, List Controls and Grid View Controls CO4: To learn to work with SQL Data Source Control and Building Data Access Components with ADO.NET.						
Examination Mode	Theory + Practical						
Assessment Tools	Written Quiz	Assignment/ Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	10%	25%	-	50%	-	
Syllabus							<b>CO Mapping</b>
<b>Unit 1</b>	<b>Introduction</b>						CO1
	Overview of .NET Framework , Common Language Runtime (CLR) The .NET Framework Class Library, familiarization with visual studio.NET IDE, Design Window, Code Window, Server Explorer, Toolbox, Docking Windows, Properties Explorer, Solution Explorer, Object Browser, Dynamic Help, Task List Explorer Features of .NET, XML Editor, Creating a Project, Add Reference, Build the Project, Debugging a Project						
<b>Unit 2</b>	<b>Introduction to Standard Controls</b>						CO2
	Display information, Accepting user input, Submitting form data, Displaying images, Using the panel control, using the hyperlink control						
	<b>Introduction to Validation Controls</b>						
	Using the required field validator control, using the range validator control, using the compare validator control, using the regular expression validator control, using the custom validator control, using the validation summary controls.						
	<b>Introduction to Rich Controls</b>						
	Accepting file uploads, Displaying a calendar, Displaying advertisement, Displaying different page views						
<b>Unit 3</b>	<b>Designing Website with Master Pages</b>						CO3
	Creating master pages, Modifying master page content, and						

## DAV UNIVERSITY, JALANDHAR

	Loading master page dynamically.	
	<b>List Controls</b> Dropdown list control, Radio button list controls, list box controls, bulleted list controls, custom list controls	
	<b>Grid View Controls</b>	
	Grid view control fundamentals, Using field with the grid view control, working with grid view control events extending the grid view control.	
<b>Unit 4</b>	<b>SQL Data Source Control</b>	CO4
	Creating database connections, Executing database commands, Using ASP.NET parameters with the SQL data source controls, programmatically executing SQL data source commands.	
	<b>Building Data Access Components with ADO.NET</b>	
	Connected data access Disconnected data access Executing a synchronous database commands, Building database objects with the .NET framework	
<b>Practical:</b>		
Text Book/s		
Reference Book/s	1.Paul J. Deitel and Harvey M. Deitel, C# 2010 for Programmers, Forth Edition New Delhi: Pearson 2010. 2.Imar Spaanjaars, Beginning ASP.NET 4: in C# and VB (Wrox), Paperback Edition, 2010. 3.George Shepherd, Microsoft ASP.NET 4 Step by Step (Microsoft), Paperback Edition, 2010. 4.Scott Mitchell, Teach Yourself ASP.NET 4 in 24 Hours, Complete Starter Kit.

Course Code	<b>CSP302</b>						
Course Title	<b>Programming in Python</b>						
Course Outcomes	CO1: To acquire programming skills in core Python. CO2: To acquire the skills of using operators and working with control constructs in Python CO3: To develop the skills of using data types and creating & designing functions & modules and object oriented programming in Python. CO4: To acquire object oriented programming, File handling and Exception Handling Skills in Python						
Examination Mode	Theory + Practical						
Assessment Tools	Written Quiz	Assignment/Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	10%	25%	-	50%	-	
Syllabus							<b>CO Mapping</b>
<b>Unit 1</b>	<b>Introduction to Python Language</b>						CO1
	Programming language, History of Python, Origin of Python Programming, Features, Limitations, Applications, Getting and Installing Python, Python Environment Variables, Python Help, Python differences from other languages						
	<b>Python Data Types and Input Output</b>						
	Keywords, Identifiers, Variables, Statements, Indentation, Documentation, Data Type, Type Conversion. Python Input and Output.						
<b>Unit 2</b>	<b>Operators and Expressions</b>						CO2
	Arithmetic, Comparison, Assignment, Logical, Bitwise, and Python special operators. Expressions, Precedence and Associativity						
	<b>Control Structures</b>						
	Decision Making Statements Python Loops Python Control Statements						
<b>Unit 3</b>	<b>Python Native Data Types</b>						CO3
	Creation of following Data Types along with methods and functions Number, String, Tuple Set, Dictionary						
	<b>Python Functions and Modules</b>						
	Creating Functions, Advantages of Functions, Types of Functions, Built-In, User Defined Functions, Anonymous Functions, Call by object reference, Call by assignment, Recursion, Designing of Modules, Importing						

## DAV UNIVERSITY, JALANDHAR

	Modules.	
<b>Unit 4</b>	<b>Python Class and Objects</b>	CO4
	Designing Classes, Creating Objects, Accessing Objects, init method, constructor, garbage collection, destroying objects, inheritance and operator overloading	
	<b>File Handling</b>	
	File creation, open() and close() methods, read() and write() methods, file modes, file encoding, file object attributes, renaming and deleting files, Python directory, directory methods and functions.	
	<b>Exception Handling</b>	
	Python Exception, Built-in Exception, Exception Handling, Try, except, finally, Python user defined exceptions	
<b>Practical:</b>

## SEMESTER 6

L	T	P	Credit
3	0	0	3

Course Code	<b>CSP311</b>						
Course Title	<b>Artificial Intelligence</b>						
Course Outcomes	<p>CO1: Demonstrate fundamental understanding of the history of artificial intelligence (AI) And its foundations.</p> <p>CO2: Apply basic principles of AI in solutions that require problem solving, inference, Perception, knowledge representation, and learning.</p> <p>CO3: Demonstrate awareness and a fundamental understanding of various applications of I techniques in intelligent agents, expert systems, artificial neural networks and other Machine learning models.</p> <p>CO4: Demonstrate proficiency developing applications in an 'AI language', expert system Shell, or data mining tool.</p>						
Examination Mode	Theory + Practical						
Assessment Tools	Written Quiz	Assignment/ Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	10%	25%	-	50%	-	
Syllabus							<b>CO Mapping</b>
Unit 1	<b>Introduction</b>						CO1
	Background and History Overview of AI applications Areas						
	<b>Knowledge Representation</b>						
	Network Representation-Associative Network & Conceptual Graphs Structured Representation- Frames & Scripts						
Unit 2	<b>Search Strategies</b>						CO2
	Strategies For State Space Search-Data Driven And Goal Driven Search Search Algorithms- Uninformed Search (Depth First, Breadth First, Depth First With Iterative Deepening) And Informed Search (Hill Climbing, Best First, A* Algorithm, etc)						
	<b>Expert Systems</b>						
	Introduction, Examples Characteristics Architecture, People Involved and Their Role in Building an Expert Systems						
Unit 3	<b>Natural Language Processing</b>						CO3

## DAV UNIVERSITY, JALANDHAR

	Introduction to Natural Language Processing Component Steps of Communication Contrast Between Formal and Natural Languages in the Context of Grammar	
	<b>Introduction to AI languages</b> Introduction to LISP and Prolog	
<b>Unit 4</b>	<b>Planning</b> Basic Representation for Planning Symbolic-Centralized Vs. Reactive-Distributed	CO4
	<b>Pattern Recognition</b> Introduction Recognition & Classification Process Learning classification patterns and clustering	
<b>Practical:</b>

Course Code	<b>CSP312</b>						
Course Title	<b>Software Engineering</b>						
Course Outcomes	CO1: Decompose the given project in various phases of a lifecycle. Choose appropriate process model depending on the user requirements. CO2: Perform various life cycle activities like analysis, design, implementation, testing and maintenance. Recognize various processes used in all the phases of the product. CO3: Apply the knowledge, techniques, and skills in the development of a software product. CO4: Explain project management techniques.						
Examination Mode	Theory + Practical						
Assessment Tools	Written Quiz	Assignment/ Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	10%	25%	-	50%	-	
Syllabus							<b>CO Mapping</b>
Unit 1	<b>Software engineering Background</b>						CO1
	Introduction to Software Engineering, Software engineering principles How is software engineering an engineering discipline Information system characteristics, software development process models, Life Cycle Concepts, Software Phases and Deliverables, Software Development Strategies						
Unit 2	<b>Technical development</b>						CO2
	Structured systems analysis and design requirements Collection and Specification Design Objectives, Design Principles Data Flow and Logical Data Modeling, Cost Benefit Analysis Feasibility study, User Interface Designs, Physical Data Design Software Development Strategies: Top-down and Bottom-up, Structured Programming Testing: Level of testing, Test cases and test criteria, Functional Testing, Structural Testing						
Unit 3	<b>Software project management</b>						CO3
	Principles of software project management organizational and team structure Project Planning, Project Initiation and Project Termination; Technical Quality And Management Plans, Project Controls, Cost Estimation Methods-Function Points and COCOMO, Tools Software quality management: quality control, quality assurance, quality standards						
Unit 4	<b>Software Development Method &amp; CASE</b>						CO4

## DAV UNIVERSITY, JALANDHAR

	Software metrics, verification and validation Software configuration management. Formal, semi-formal and informal methods Data function, and event based modeling CASE Tools, CASE Standards Software documentation, Types of software Maintenance	
<b>Practical:</b>		
Text Book/s		
Reference Book/s	<ol style="list-style-type: none"><li>1. Pressman R. S., <i>Software Engineering: A practitioner's Approach</i>, New York: McGraw Hill, Seventh Edition 2010.</li><li>2. Course Code	<b>CSP313</b>						
Course Title	<b>Mobile Application Development</b>						
Course Outcomes	On the completion of the course the student will be able to: CO1: Discuss android history, versions with its characteristics and application model. CO2: Describe UI Widgets and Activity, Intent and Fragment. CO3: Introduce android Menu and Layout Manager and Android Service CO4: Learn content provider fundamentals and multimedia.						
Examination Mode	Theory+Practical						
Assessment Tools	Written Quiz	Assignment/Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	-	25%	-	35%	25%	5%
Syllabus							<b>CO Mapping</b>
Unit 1	<b>Introduction and its Significance (10 Hours)</b>						CO 1
•	What is Android, History of Android, Importance of Java Language for Android apps, other mobile OS-es, Android versions and different development tools.						
•	Characteristics and Benefits, Frameworks and Tools, Application Model Profiles of Mobile Devices						
Unit 2	<b>UI Widgets and Activity, Intent &amp; Fragment (12 Hours)</b>						CO 2
•	Working with Button, Toast, CustomToast, Button, Toggle Button, SwitchButton, Image Button, CheckBox						
•	Alert Dialog, Spinner, AutoCompleteTextView, RatingBar, DatePicker, TimePicker, ProgressBar, Quick Contact Budge						
Unit 3	<b>Android Menu and Layout Manager (12 Hours)</b>						CO 3
•	Option Menu, Context Menu and Popup Menu, Relative Layout, Linear Layout, Table Layout and Grid Layout						
	<b>Android Service</b>						
•	Android Service, Android Service API, Android Started Service, Android Bound Service, Android Service Life Cycle and Android Service Example						
Unit 4	<b>Content Provider and Multimedia (12 Hours)</b>						CO 4
•	Content Provider Fundamental, Notification API, Creating Notification Builder, Playing Audio						
•	Location API, Working with Camera, Motion Sensor						
•	Android P2P Communication and Android Google Map						
Practical	<b>List of Experiments:</b> 1.Using emulator to deploy and run mobile apps 2.Create an Android application that shows Hello + name of the user and run it on an emulator.						

## DAV UNIVERSITY, JALANDHAR

	<p>3. Create an application that takes the name from a text box and shows hello message along with the name entered in text box, when the user clicks the OK button.</p> <p>4. Develop an ANDRIOD application that uses GUI components, Font and Colors.</p> <p>5. Write an application that draws basic graphical primitives on the screen. Develop an application that uses Layout Managers and event listeners.</p> <p>6. Create and Login application as above. On successful login, open browser with any URL.</p> <p>7. Testing mobile app - unit testing, black box testing and test automation.</p>	
<b>Textbook</b>	<p>1. Anubhav Pradhan, Anil V Deshpande, "Mobile Apps Development" Edition: I</p> <p>2. Jeff McWherter, Scott Gowell "Professional Mobile Application Development", John Wiley &amp; Sons, 2012.</p>	
<b>Reference Book/s</b>	<p>1. Os Swift, "Android App Development &amp; Programming Guide: Learn in a Day", CreateSpace Independent Publishing Platform (October 2, 2015).</p> <p>2. Course Code	<b>CSP314</b>						
Course Title	<b>Discrete Mathematics</b>						
Course Outcomes	CO1: To acquaint the students with the basic concepts of set, relation and function. CO2 : To acquaint the students with the basic concepts of Pigeonhole principle and permutation and combination. CO3: To acquaint the students with the basic concepts of recursive relation and generating functions. CO4: To acquaint the students with the basic concepts graph theory. CO5: To acquaint the students with the basic concepts of Inference theory.						
Examination Mode	Theory + Practical						
Assessment Tools	Written Quiz	Assignment/ Project Work	MSE	MTP	ESE	EPR	ABL/PBL
Weightage	10%	10%	25%	-	50%	-	
Syllabus							<b>CO Mapping</b>
Unit 1	<b>Introduction</b>						CO1
	Introduction to Sets Finite and Infinite Sets, Unaccountably Infinite Sets. Introduction to Functions and relations, Properties of Binary relations, Closure, Partial Ordering Relations.						
Unit 2	Pigeonhole Principle Permutation and Combinations, Mathematical Induction, Principle of Inclusion and Exclusion Asymptotic Notations						CO2
Unit 3	<b>Recurrence Relations</b> Introduction, Generating Functions, Linear Recurrence Relations with constant coefficients and their solution <b>Graphs Theory</b> Basic Terminology of Graphs, Models and Types, Multigraphs, Weighted Graphs, Graph Representation. Graph Isomorphism Graph Connectivity, Euler and Hamiltonian Paths and Circuits, Planar Graphs, Graph Coloring, Basic Terminology of Trees, Properties of Trees, Spanning Trees.						CO3
Unit 4	<b>Inference Theory</b> Introduction, Logical Connectives, Well Formed Formulas, Tautologies, Equivalence						CO4
Practical:							
Text Book/s
