## Fitness awareness

Health is reflection of one's overall physical, mental and social wellness . It is a quality of life that enables the individual to live the most and serve the best. It is a state of relatively equilibrium of body form and function which result from its successful dynamic adjustment to forces tending to disturb it. Regular physical activity along with a nutritious diet is the key to maintain a healthy life. Creating awareness on health and physical fitness is a big challenge in the socially and economically weaker section people in any country. To inculcate the knowledge and awareness of importance and benefits of health and physical fitness, there is a great need to include health education in the education system of India. Regular physical activity along with good habits will lead to positive life style which in turn yields happiness and joy. This book is evolved from an attempt made to analyse the awareness of health and physical fitness, status of physical fitness and academic achievements among the students of four different categories of higher secondary schools of southern districts of Tamilnadu, India.

Report: Cow is revered by more than 70% of the population of our country. Although the cattle population of the country is dominated by indigenous cattle, but the population of crossbred cattle has increased significantly. This poses threat to genetic diversity of our indigenous cattle. There is yet another problem of large number of stray cattle in the country and their number is still increasing. Gaushalas are good alternative to manage the ever-increasing stray cattle population and also to conserve our deteriorating genetic base. Students of department of education, DAV University visited Govind Gaushala, Darapur with an aim to collect and analyse information about routine operations of the shelters and manager's attitude towards cow and cow welfare. The manager of the shelter provides an interface between visitors, workers and cattles and is best able to understand the challenges of running shelters.

### 1. Event Name: Farmers awareness campaign at village Kala Bahian

**Organiser:** Department of Zoology and village Panchayat of Ballan

**Date:** 11 May 2022

Organized by: DAV University in collaboration with NIT Jalandhar

Funded by: Punjab State Council for Science & Technology, Department of Science and Technology, Government of India

Number of Participants: 100 (comprising school students and local villagers)

On May 11, 2022, National Technology Day was celebrated in Village Kala Bahian, an event jointly organized by DAV University and NIT Jalandhar, with funding support from the Punjab State Council for Science & Technology, Department of Science and Technology, Government of India. The program aimed to spread awareness about sustainable and green technologies among the rural population, attracting around 100 participants, including school students and local villagers.

The event commenced with a session led by resource persons from the Punjab State Power Corporation Limited (PSPCL), who educated the gathering on the use of solar energy. Their presentation focused on the benefits of solar energy as a clean, renewable source of power, particularly its potential to meet the energy needs of rural communities while reducing dependence on non-renewable energy sources.

Following this, Ms. Alokika Vashist and Mr. Akhil Kumar from the organizing teams shared insights on green technology. They emphasized the role of eco-friendly practices and the importance of adopting sustainable technologies to mitigate the adverse effects of climate change and promote environmental conservation. Their session inspired participants to think about how small changes in their daily lives could contribute to a healthier planet.

To engage the students in a creative and meaningful way, a poster-making competition was held on the theme "Use of Technology for Sustainable Development." School students enthusiastically participated, showcasing their innovative ideas and understanding of how technology can contribute to a more sustainable future. The posters reflected diverse perspectives on topics such as renewable energy, waste management, and conservation technologies.

The event concluded with the announcement of the winners of the poster-making competition, who were awarded prizes by representatives from DAV University and NIT
